Snowmen at Night

BY MACIE OPALINSKI

Down at the North Pole, snowmen are just waking up for their big adventure to begin. One by one each snowman grabs a reindeer and off they go!

They fly over towns, cities, and lakes and eventually find a glowing sign that says WEIRS BEACH.
The snowmen quickly dash for the sign and land.

Immediately they see games and prizes and quickly run over to play.

One tries ball toss, but can't hold the ball in his wooden fingers. Another plays spider stomp, but doesn't have much stomp. Then they all smell something greasy and totally yummy, they spy where the smells are coming from and run there as fast as they can.

When the snowmen arrive they find a slight problem: the pizza place is closed! But the snowmen know what to do so they close their eyes and poof! ***Snowman MAGIC***!

The door flies open and the snowmen ran in and out as fast as they could so they wouldn't melt.

After they were done 1, 2, 3, all dove down the steep mountain and headed for the pier to see the sun rise but one snowman remembers they have no time to dilly-dally, the North Pole is waking up!

Quickly one by one each snowman hops on a reindeer and glides through the air. One shouts out, "I know where we're going tomorrow night!"

And soon enough they are all back in place, just as the sun rises.
